

How to Access WebServices Settings

Access application settings.

The webservices settings are as illustrated below:

Webservices username	<input type="password"/>
Webservices token	<input type="password"/>
Renew webservices token	<input type="text" value="no"/>
Enable webservices	<input type="text" value="yes"/>
Webservices IP range	<input type="text" value="****"/> 

You can adjust the settings to suit the needs of your application.
